LIGHTBOX Series NextGeneration Desktop UTM Firewall

Quedra LightBox

Quedra LightBox Series is the next generation Network Security solution that provides advanced network security and access solution for small, medium and medium-large businesses and edge offices. With its experience in network technologies, Quedra offers both flexible access and access control features and advanced products against all kinds of new generation network security threats.

Key Features :

- Easy setup with innate SD-WAN features
- All of the Next Generation Firewall features
- VPN support for remote access
- Rich Routing capabilities
- Configuration suitable for all types of networks with different operating modes
- Control panel where you can view all network objects and their states simultaneously
- Real-time network attack prevention (IPS)
- Gateway based Anti Virus and Anti Spam
- Deep packet inspection with DPI technology
- Application Security
- Protection for all types of DoS, BotNET attacks
- IP Based and MAC based filtering
- WAN Load Balance, FailOver support
- Server Load Balance support
- Bandwidth upgrade with LACP

Next Generation Network Security

Quedra LightBox NGFW product offers high performance solutions with its rich network features ranging from Layer 2 to Layer 7. It provides full compatibility with your network thanks to its configuration flexibility. It strengthens your network with security functions, increasing overall network security.

Flexable Network Topology

Quedra LightBox Series adapts to any network architecture thanks to its SDWAN features. It performs fast and performance switching and routing. Thanks to its VPN features, you can easily access your network remotely and control your branches as if in the center.

www.quedra.com

LIGHTBOX Series

NextGeneration Desktop UTM Firewall

HotSpot and Internet Access Control

- Guest user management
- Multi-language support in access control
- Welcome page customization
- Time and usage limitation
- Multiple device support for one user
- Local user authentication
- User authentication via SMS
- User authentication with TR ID number
- User authentication with external databases

Logging and Reports

- SysLog support
- All network activity logs
- Detailed activity logs
- Instant system information
- Records in accordance with TR Law No. 5651
- Ability to transfer recordings to different media
- Accuracy and integrity preservation

Network and Security Layers

- Stateful Package Inspection SPI
- Network Address Translation NAT
- Policy Based Routing PBR
- IP:MAC mapping
- Static Routing
- Destination, Source and Port based Routing
- Bandwidth Management
- Static and Dynamic IP
- DHCP Server and Client
- PPPoE / IPoE Support
- DNS Proxy Support
- VLAN Support
- VPN (IPSec, SSLVPN, OpenVPN)
- Load Balance and Failover Support
- URL Filtering
- Category and word Based Filtering
- Customizable address, word, file based filtering
- Virus, Trojan plug-in and Malware blocking
- Autonomous Security Database Signature Update
- Application Filtering
- Signature-Based Category-Based Intrusion Detection
 and Prevention

SPECIFICATIONS

0	perating Modes	V	
•	OSI Layer 2 Transparent	•	
•	OSI Layer 3 Routing + Stealth Mode		
•	Virtual Wire		
Ro	outing		
•	IPv4 / IPv6 Static Routing		
•	PBR - Policy Based Routing		
•	OSPF - Open Shortest Path First Protocol		
•	BGP - Border Gateway Protocol	•	
•	RIP / RIPng - Routing Information Protocol	•	
•	PIM SM/SSM IGMP v2/v3 Multicast Routing	•	
•	Routing Monitor	•	
N	etwork Interface Specifications	Se	
•	Loopback Interface, IEEE802.1Q VLAN support	•	
•	Link Aggregation :	•	
	> LACP, Failover, Load Balance, Round Robin	•	
•	Bridging / STP / Ethernet Bypass	•	
•	Virtual Extensible LAN (VXLAN)	•	
•	NAT64, IPv6 6to4 Tunneling	•	
•	Static ARP	•	
•	PPP ve PPPoE Connection Interface	•	
•	3G/4G/LTE Modem Support	•	
Se	ecurity Specifications	•	
•	Zone Based Firewall	•	
•	Application Security (AppID)	•	
•	Honeypot Trapping	•	
•	Traffic Rate Limiting	•	
•	Multi-Policy, Section and Profile Support	•	
•	Time Based Security Policy Management	•	
•	IPS - Intrusion Detection and Prevention	•	
•	SPI - Statefull Packet Inspection	•	
•	DPI - Deep Packet Inspection		
•	http / https Web Filtering (SNI / DPI)	•	
•	DNS Query Filtering	•	
•	Interface Based Anti Spoofing (Sym and Asym)	•	
•	MAC Based Quarantine	•	
•	MAC - IP Matching Control	•	
•	ARP Poisoning Protection		
•	Flood Intrusion Prevention	•	
•	Gateway Anti Virüs / Anti Malware ***	•	
•	SSH Inspection, Anti Botnet	•	
•	DoS Prevention - Connection Limiting	•	
•	XFF Scan - Trusted Proxy Servers	•	
	Service Based Timeout Control		

VP	PN - Virtual Private Network
•	SSL VPN
	> Certificate Verification
	User Credentials Verification (+ 2FA)
	> Authentication:
	BLAKE2*, RSA*, SHA*, MD*, SHAKE*
	> Encryption:
	AES*, ARIA*, CAMELLIA*, SEED*, SM4*
•	PPTP / L2TP VPN, L2TP over IPSec
•	IPsec VPN (Both VTI and Legacy Mode)
•	Site to Site VPN
•	GRE Tunnelling
Se	rvices
•	Live Dashboard
•	Automated Update System
•	Offline Update
•	Automatic Configuration Backup
•	DHCPv4/v6 Server, Relay and Monitor
•	Authenticated http/https Proxy
•	Quedra Shared Management-Virtual System
•	QoS - Effective Bandwidth Management
•	Time and Quota Adjustable Hotspot(Captive)
•	Bandwidth Monitor
•	Quedra Registry Service
•	Quedra Announcement Service
•	NetFlow Export Service
•	RADIUS Server and Proxy
•	Domain Based http/https Forwarding
•	https SSL Offload Service
•	SNMP v2/v3 Service
•	RRD Service
	> Number of Active Users and Bandwidth
•	http/https Caching
•	Domain Based Bandwidth Limiting
•	Log Timestamping
•	Timestamp Integration
•	Syslog (TCP/UDP/TLS) - supported formats;
	> RAW, CEF, EWMM, GELF, JSON, WELF, CIM
•	Black Hole Service
•	Campus Information Service
•	LLDP Service
•	GEO-IP Service
•	Quedra Central Management/Logging Integration
