Overview

8116V is a high-performance CPE that support 5G NR and WiFi6 technology. It implements the conversion between 5G NR/LTE wireless data and wired Ethernet data. It supports 802.11ax WiFi6 and can be used independently.

High Performance

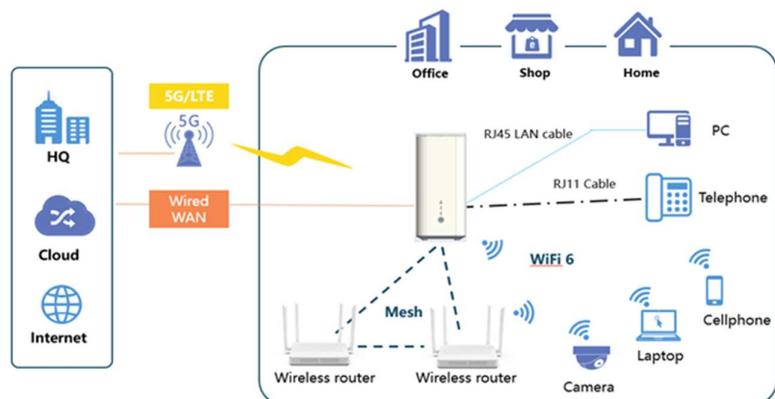

8116V supports the worldwide 5G NR/LTE network, the highest data rate can arrive 3.4Gbps. And the WLAN supports the newest IEEE 802.11ax standards. The AX3000 (2.4Ghz: 600Mbps. / 5Ghz:2400Mbps.) WiFi data rate can easily supply the HD video, online game, and high-quality network applications.

Versatility

8116V also support VoLTE/VoNR, SMS, firewall, VPN, QoS, etc. It satisfies the multi-directional requirements of users. Multiple management and maintenance methods (TR069/CLI) are convenient for checking and operating. The software online update tool will also constantly provide the upgrade of these functions.

High Availability

8116V Supports dual connection of 5G NR and wired WAN, backup between air and ground; automatic detects network faults and switches line, to ensure that network access never fails.
