### ULTRA-EFFICIENT & FLEXIBLE

RS408/RS408-RP provides ultra-speedy data transmission and powerful computing capability, which is not only suitable for corporate environments that demand on efficiency, but also a great choice for power users who massively access data on the server.

### 2 NETWORK INTERFACES

The 2 Gigabit LAN port design allows the RS408 to work in two subnets simultaneously or in one subnet with 2 different IP addresses. It is designed particularly for corporate environments utilizing more than one LAN.

### WORK WITH WINDOWS ADS

RS408/RS408-RP is compatible with Windows ADS. Windows domain users are able to access data shared from RS408/RS408-RP when they pass the Active Directory authentication. This will greatly save your time on creating large amount of accounts for the domain users.

### IP CAMERA VIDEO RECORDING

When connecting IP cameras to the network and recording the videos to the RS408/RS408-RP, Surveillance Station provides you an economical network video recording solution. On Surveillance Station, you can watch the camera-monitored area on a real-time basis, and also view and manage the recorded video clips. Feel free to choose either the continuous or motion-detection recording mode that best fits your need.

### FLEXIBLE STORAGE MANAGEMENT

RS408/RS408-RP allows you to create RAID 0, RAID 1, RAID 5, or RAID 6 volume on it. Its flexible storage management allows you to upgrade from Basic to RAID 1, or to assemble with smaller hard drives first, and later on expand the RAID 1, RAID 5, or RAID 6 volume by replacing the existing hard drives with larger ones when budget is allowed. Moreover, you can also expand the RAID 5 and RAID 6 volume by adding a hard drive on the fly. When the hard drives on RS408/RS408-RP are full, you can expand the storage capacity simply by attaching an external hard drive to the USB port of RS408/RS408-RP.

### SECURITY ENHANCEMENTS

- Encrypted FTP allows you to transmit data using "FTP over SSL" or "FTP over TLS" option.
  - HTTPS support encrypts all HTTP connections with SSL transport mechanism.
  - Encrypted Network Backup ensures Network Backup is done with encrypted data transmission.
- You no longer need to worry about critical data being exposed in danger.

### TOTAL BACKUP SOLUTIONS

Data backup is so important but people tend to ignore it, RS408/RS408-RP makes data backup so complete and automatic that backups are always done without your attention. You can always find the backup alternatives that fit your needs.

- Network Backup is designed for you to back up data from RS408 to another Synology product that also supports Network Backup function or rsync-compatible server.
- Local Backup allows you to back up data from RS408 to external hard drive attached to RS408 via the USB port.
- Desktop Backup simplifies desktop backup with Synology Data Replicator 3. PC users will enjoy the easy-to-use backup tool to back up important data automatically.

### SHARE FILES BETWEEN WINDOWS AND MAC

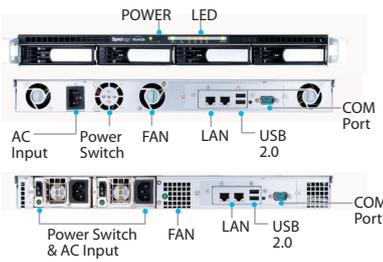

RS408/RS408-RP is designed for Windows users and Mac users to share files seamlessly. Windows users can access RS408 via Samba and FTP, and Mac users via Samba, FTP, and AFP. Unicode support allows sharing files smoothly in different languages.

Even more, File Station is a great way for you to remotely access and manage files stored on RS408/RS408-RP. Simply use a web browser to connect to RS408/RS408-RP, and you'll have total control over the files. With File Station, moving files among shared folders will now be only seconds away!
