

DiskStation DS416

Synology DiskStation DS416 is a high-performance and feature-rich 4-bay NAS specifically designed for small businesses and home users to effectively manage, protect and share data. Equipped with comprehensive office applications, DS416 raises working efficiency while securing data with full backup solutions. Synology DS416 is backed with Synology's 2-year limited warranty.

Highlights

- Dual-core CPU with hardware encryption engine
- Dual LAN with failover and link aggregation support
- Over 221.05MB/s reading, 139.51MB/s writing¹
- Effective backup solution for all desktop and mobile devices
- Front USB 3.0 for fast easy access
- Hot-swappable & tool-less hard drive tray design
- Running on Synology DiskStation Manager (DSM)

Optimal Price/Performance Ratio

Synology DS416 features a powerful **dual-core CPU** with **hardware encryption engine**, **1GB RAM**, **two Gigabit LAN ports**, **three USB3.0 ports**, and **tool-less drive trays**, standing out as one of the best values in 4-bay NAS devices available today.

Under link aggregation, DS416 delivers over **221.05 MB/s reading** speed under RAID 5 configuration in a Windows® environment, and over **139.51 MB/s writing**.¹ Powered with hardware encryption engine, DS416 delivers fast encrypted data transmission speeds of up to **146.5 MB/s reading** and **65.85 MB/s writing**.¹

Designed with attention to recovery mechanism, DS416 comes with dual LAN failover support to ensure continual network service in case of LAN failure, while hot-swappable design facilitates easy drive replacement. External storage access is made fast and easy, with three USB 3.0 interfaces both in the back and the front panel for quick access.

Cross Platform File Sharing and Mobile Access

Comprehensive network protocol support assures seamless file sharing across Windows, Mac®, and Linux® platforms. **Windows ADS** integration allows Synology DS416 to quickly and easily fit in an existing business network environment with no need to recreate user accounts. **Windows ACL** support provides much finer-grained access control and efficient privilege settings, allowing users to enjoy native Windows experience. The **User Home** feature minimizes the administrator's effort in creating a private shared folder for a large amount of users.

Internet file access is simplified by the encrypted FTP server and the web-based **File Station**. HTTPS, the built-in firewall, and IP auto-block support ensure file sharing over the Internet is protected at a high security level. For users who are always on the move, Synology provides a handy app, **DS file**, for popular mobile devices such as iPhone®, iPad®, Android™ devices and Windows Phone. Anything stored on Synology DS416 can be accessed remotely using DS file.

Cross-platform File Synchronization

Auto-synchronize your files among DiskStation, PC and mobile devices using Synology Cloud Station.

Anytime Availability

Access your DiskStation anywhere using Synology mobile apps.

Easy Backup Solutions

To protect your valuable data, DS416 can become a centralized backup destination for consolidating fragmented and unstructured information across your network through a range of options. Advanced backup privilege management makes network backup tasks safer and more efficient. **Cloud Station** with selective sync and **ACL control** provides real-time data backup and synchronization among multiple computers and mobile devices. Complete backup solutions such as **Backup & Replication** minimize the impact of disasters.

Rich Office Applications

Synology DS416 runs on the award-winning operating system, **Synology DiskStation Manager (DSM)**, which offers comprehensive applications and features designed specifically for growing businesses.

Mail Server turns Synology DS416 into a dedicated mail service provider, while **Mail Station** provides a webmail interface for users to access emails stored on Synology DS416.

VPN Server offers an easy VPN solution that provides a secure way of connecting to a private LAN at a remote location. **RADIUS Server** strengthens network security by overseeing wireless access authentication via RADIUS (Remote Authentication Dial-In User Service) networking protocol.

24/7 Security Solution

Synology **Surveillance Station** offers a centralized interface to manage IP cameras deployed in your office or home, allowing users traveling miles away to safeguard the environment by watching live views, recording events, and taking snapshots with a computer or mobile device. DS416 is an ideal surveillance solution as it is capable of hosting up to **25 IP cameras** (750 FPS at 720p). In addition to its intuitive setup and hassle-free interface, Surveillance Station features an optimized live view experience with on-screen operations, smart analytic tools like motion detection, and an alert system that sends instant notification through **DS cam**, SMS, and e-mail.

Energy Efficient with Cool and Quiet Design

All Synology NAS is designed with energy efficiency in mind. Not only does DS416 provide two 92 mm x 92 mm fans and the smart airflow to keep the system running cool 24/7, its noise dampening design makes it really quiet compared to PC counterparts. The support of Wake on LAN/WAN, multiple scheduled power on/off can further reduce power consumption and operation cost.

All Synology products are produced with RoHS compliant parts and packed with recyclable packing materials. Synology acknowledges the responsibility as a global citizen to continually work to reduce the environmental impact of every product produced.
